

SEBO-NORMALIZING
ANTI-SHINE PORE REFINER
MATT PRO-CONTROL

NEW

30 ml

INDICATIONS

- Recommended for use on skin prone to oiliness with excessive shine, seborrhoea and prominent, enlarged pores.
- Recommended for minimizing occasional comedones, pustules and papules (resulting from hormonal changes, stress and external factors).
- Perfect as a make-up primer, providing a matte finish.
- Dedicated to sensitive, demanding skin.

EFFECTS OF THE FORMULA
AND ITS ACTIVE INGREDIENTS

- Thanks to its lightweight consistency, the product instantly provides a long-lasting matte finish without leaving the skin dry.
- It also reduces the visibility of existing acne lesions and smooths out the skin structure.
- **Immuno-Prebiotic Formula** – controls cutaneous microflora, providing a physiological hydration level.
- **Pore-Refiner Complex** – provides a long-lasting matte finish, tightens the pores and reduces their number.
- **Calm-Interleukine** – relieves irritation, reducing the skin's hypersensitivity and strengthening its physiological barrier.
- The formulation does not clog the pores or dry out the skin.

HIGH TOLERANCE AND EFFICACY. DERMATOLOGICALLY TESTED.

Active ingredients: Immuno-Prebiotic formula | Pore-Refiner Complex | Calm-Interleukine

EFFICACY PROVEN IN TESTS
ON ACNE-PRONE SKIN*

88% provides long-lasting matte finish

NEW

INDICATIONS

- Recommended for adults with acne lesions and oily skin, seborrhoea and prominent, enlarged pores.
- Recommended for minimisation of deep wrinkles.
- Recommended for sensitive and problematic skin prone to irritation, also for skin after pharmacological treatments.

ANTI-WRINKLE ACTION

- Reduces the visibility of wrinkles and furrows.
- Evens out the skin structure.
- Firms up and provides appropriate skin tonus.

ANTI-ACNE EFFECT

- Eliminates existing imperfections, i.e. comedones, papules, pustules and blemishes.
- Inhibits the tendency for new imperfections to appear.
- Reduces the tendency for oil buildup and skin shining.
- Unblocks and tightens the pores.
- Reduces the size and amount of pores.

HIGH TOLERANCE AND EFFICACY. DERMATOLOGICALLY TESTED.

Active ingredients: pure Retinol 0.3% | Shea butter | olive wax
4% biomimetic squalane | cottonseed oil

Contraindications: The preparation should not be used by pregnant women and patients currently undergoing treatment with oral retinoids.

PURE RETINOL 0.3%

The cream has a balanced anti-wrinkle and anti-acne effect based on a dermatological ingredient present at the highest recommended concentration.

INNOVATIVE, EFFECTIVE INGREDIENTS

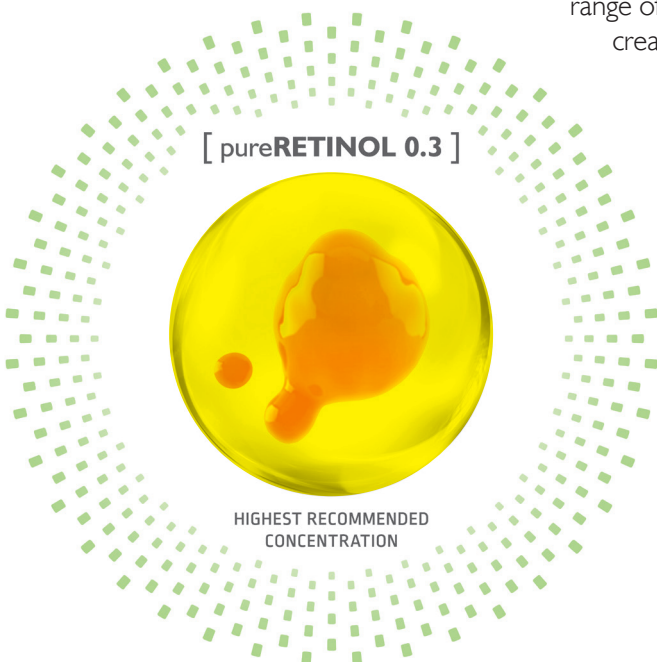

Pure Retinol 0.3% – one of the most effective dermatological ingredients with a wide range of applications in anti-acne and anti-ageing treatments. It has been used in the cream at the highest recommended concentration permitted for dermocosmetics.

Retinol, a pure form of vitamin A, is transformed in the skin cells into retinoic acid, which stimulates collagen production and skin renewal processes. Reduces the depth of wrinkles and furrows, strengthens the skin tonus. **Vitamin A** accelerates the exfoliation of dead skin cells, unblocking the pores and normalising the function of sebaceous glands during periods of hormonal imbalance and acne aggravation. It also lightens sun and hormonal discolourations that appears on the skin.

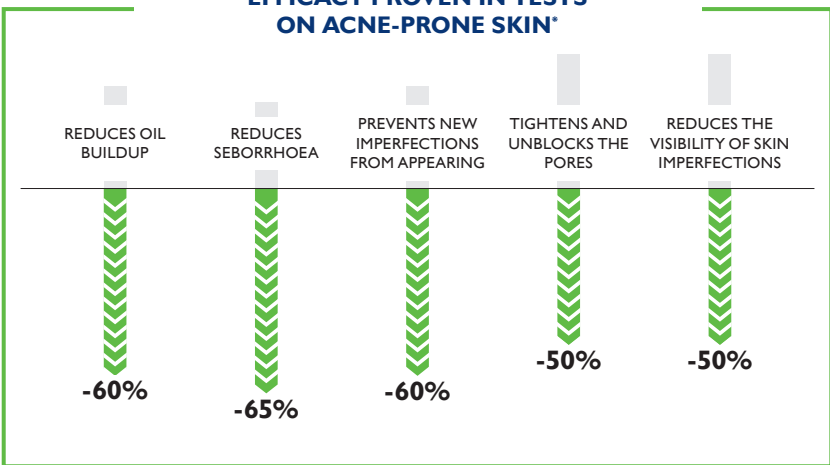

Shea butter and olive wax – regenerate and soften the skin without leaving a greasy layer.

4% biomimetic squalane – strengthens the skin's physiological barrier, protecting it from the harmful influence of external factors.

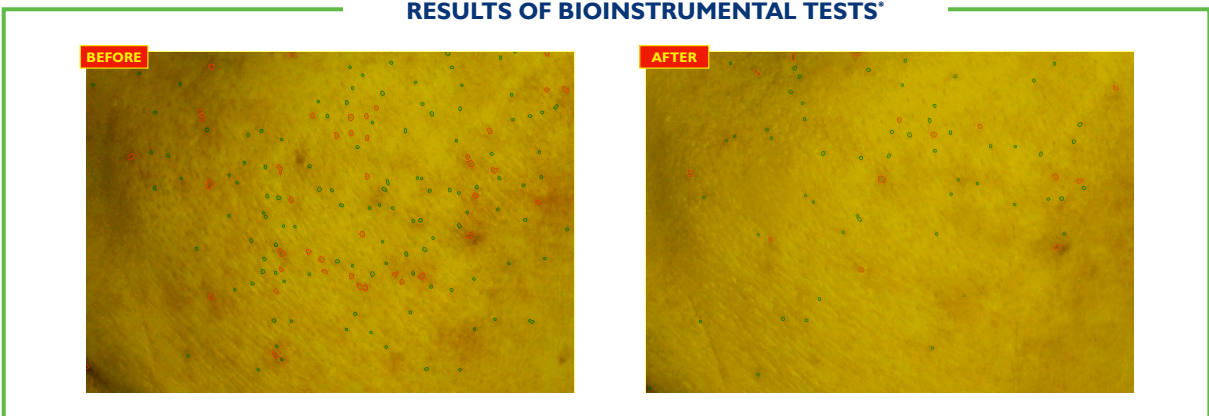

Cottonseed oil – nourishes and softens the skin, reducing water loss from the epidermis.
